

The Port Spencer Project Geotechnical Investigation Notification

Peninsula Ports would like to notify you of geotechnical investigations occurring as part of the proposed Port Spencer Project (the project) at the proposed locations as pictured below.

What will be the timing of the works?

Works are scheduled to commence from Tuesday 8th October 2019 and be completed by Friday 11th October 2019, weather permitting. The works will occur between the hours of 8am and 5pm, between Monday to Friday.

What will the works involve?

Works will include excavating and trial crushing site won rock (typically granite), as well as recovering rock and crushed rock samples, to ascertain the suitability or otherwise of using the site rock for use in construction of the project. In addition, the works will validate the extent of site rock that is in near proximity to the proposed jetty construction platform and the silo pads. Heavy equipment is required to complete this investigation work however this does not constitute the commencement of construction.

The Port Spencer Project Geotechnical Investigation Notification

Will there be any disruptions?

These works are being undertaken during the day to complete the works as safely and efficiently as possible. Access to properties adjacent the site will not be impacted through-out the works.

Lipson Cove Road will remain open to traffic in both directions at all times. Every effort will be made to minimise noise and dust impacts to nearby residents. However some noise and dust will be unavoidable during the works period.

All relevant permits will be in place prior to undertaking any investigation works.

Will native vegetation be disturbed?

For agricultural purposes not related to the project, most of the site area is already clear of native vegetation. The locations selected for investigative works will be chosen so as to avoid disturbing any native vegetation.

The existing project approvals explained

These works are necessary to ascertain the suitability of site rock for the project's construction. The findings will form part of an amendment to the project's existing development approval and Public Environmental Report (PER). The amendment to the existing PER is being submitted to the South Australian Government for which a public consultation period will follow.

The project site was previously owned by Centrex Metals who successfully sought development consent to export both iron ore and grain from the site. While the existing development approval is still valid and was transferred to Peninsula Ports in 2019 (following FREE Eyre purchasing the land from Centrex Metals), an amendment is required as Peninsula Ports only intends to export grain.

We want to stay connected with you

As more information becomes available, we would like to regularly update anyone who has an interest in the project. In order for us reach out to you effectively and efficiently, we encourage you to sign up to our project mailing list for electronic updates.

To register for project updates and to get in touch with our team, please contact us at (08) 8232 9266 or info@peninsulaports.com.au. Peninsula Ports appreciates your patience and cooperation whilst these important works are undertaken.
